Subject: Statement from Cabot on Dimock

An Associated Press article included this statement from Cabot:

A Cabot spokesman said in a statement Friday that the "data confirms the earlier EPA finding that levels of contaminants found do not possess a threat to human health and the environment."

"Importantly, the EPA again did not indicate that those contaminants that were detected bore any relationship to oil and gas development in the Dimock area, particularly given the fact that any contaminants are more likely indicative of naturally-occurring background levels or other unrelated activities," the statement said.
